

Sage Line 50 to Pegasus Opera II: Why upgrade?

Software for evolving businesses

A complete end-to-end solution, Opera II offers Sales Pipeline Management, sophisticated Financials, Supply Chain Management, Payroll & HR and analysis and reporting. It's modular and can be fully tailored to your requirements, now and as you grow.

The integrated data conversion utility makes the transition from Sage Line 50 seamless. And Opera II is so intuitive that it can be deployed without the need for extensive training, keeping implementation costs low and allowing you to receive a rapid return on your investment.

Why Opera II?

As a growing business you require:

- Business expansion: you're running out of processing power
- Security: advanced security options such as definable menu access per user
- Nominal Ledger: cost centre analysis plus two additional floating analysis codes
- Consolidation: consolidate companies with different currencies for Group results
- Stock: unlimited suppliers, with cost prices and economic order quantities
- Multi warehousing: full stock location management with quarantine and multi-location transfers
- Price lists: price matrix with quantity breaks per stock line per customer
- Batch processing: time-saving progression of multiple documents in one process
- Multiple charges per order: ability to record delivery and carriage charges
- Back to back: purchase documents or orders from sales orders
- Goods Received Notes: match receipt to order

Key Features

Opera II Views

Create multi-level, easy to understand views of your Opera II data. Totally dynamic, the Views provide up to date transactional information with full drilldown capabilities.

Pegasus Instant Messenger

Pegasus Instant Messenger is much more than an instant messaging facility: it can be configured to alert you when critical events happen within Opera II, such as payment terms being exceeded, minimum stock levels being reached, overdue invoices and more.

Customisation potential

In addition to a wealth of out-of-the-box functionality, Opera II offers potential for adding tailor-made features; its open development environment means it can be expanded and modified to suit the individual needs of your business.

Online Filing Manager

Part of Opera II Payroll & HR, Online Filing Manager enables you to quickly and accurately file End-of-Year Returns and in-year forms online via the Government Gateway, and is fully accredited by HMRC. The Test Submission facility eliminates the risk of a penalty by validating your entries.

Pegasus XRL: accessing Opera II data from within Microsoft Excel®

Pegasus XRL provides dynamic access to data held within Opera II which can be imported into your Excel worksheets. This information can then be manipulated and combined with key data from other corporate or external sources.

- Cross-company reporting
- Cube analysis for multi-dimensional reporting
- Progressive live drilldown from Excel to the underlying Opera II transactions
- Nominal Ledger budgets, price lists and stock adjustments manipulated in Excel can then be written back into Opera II

"We were rapidly growing and needed an integrated system that could cope with 3,000 direct debit transactions in one day. Opera II provides us with real-time credit control at any time of the day and is updated instantly once another direct debit transaction is taken."
